

## Nursing Home Emergency Management

Having a trusted emergency management system in place means more peace of mind—for you, your staff, and your residents.

### Description

Our nursing home emergency management systems cover all aspects of fire safety, health & safety and emergency management, including training courses to ensure your staff have the necessary knowledge and equipment to respond quickly and effectively in the event of an emergency.

*We also work closely with regulators on your behalf to help your nursing home achieve:*

#### Fire & Rescue Service Compliance

Submission of pre-fire planning drawings and supporting documentation, including critical information such as entry points, access routes & fire hydrant locations.

#### Health & Safety Authority Compliance

Meeting your legal requirement of having an up-to-date safety management system, including risk management policy, risk assessments and a safety statement describing health & safety procedures in your centre.

#### HIQA Compliance

Ensuring your facility is fully compliant in the areas of fire safety, health & safety and emergency management, including guidance on Assessment Judgment Framework for Designated Centres for Older People (DCOP).

#### Fire Drill Certification

Providing your staff with the necessary training to respond quickly and effectively in the event of a fire through certified fire drills, which are run and assessed by our experienced team of training professionals.

**INDIVIDUAL NURSING HOME SYSTEMS**

When it comes to safety, we don't believe in a one-size-fits-all approach. That's why we're proud to offer a range of systems to cater to the specific needs of your nursing home.

**EVERY SYSTEM INCLUDES:**

**SIMPLE PAYMENT PLAN**

**SECURE PAPERLESS PORTAL**
